

## PRESS RELEASE

Enermax launches new power supply series ECO80+

### Efficient PC power with patented cooling technology

The interest in energy-saving PC systems is continuously growing. Leading manufacturer Enermax provides with new PSU series ECO80+ a stable and high-efficient solution for low-wattage PC systems at a reasonable price.

**Hamburg, 25th May 2009.** ECO80+ is available with 350W and is designed for low range PC, guaranteeing usual high Enermax quality and assuring an efficient power supply with up to 86 % efficiency (80PLUS® certification). Users profit from innovative and forward-looking technology with first-class components and massive 12V rails for a powerful and stable performance. ECO80+ is further well prepared to shield the system against all possible malfunctions from overvoltage to short circuit. The octuple SafeGuard offers currently the most advanced protection on the PSU market.

#### Well combined: ECO80+ meets Magma

Since almost 20 years Enermax manufactures reliable and high-quality power supplies. The new PSU series ECO80+ combines the long-lasting experience as PSU manufacturer with the innovative achievements of the more recent cooling fan division of Enermax. ECO80+ is equipped with a 12cm fan of the **Enermax Magma** series which is well known for excellent performance and silence. It is based on the Twister Bearing Technology which guarantees an almost frictionless operation and a long lifetime (up to 100.000 hours). The patented air-inlet of the AirGuard and the fuzzy logic based SpeedGuard complete the innovative cooling performance of ECO80+. The low noise level makes it even to an optimal choice for HTPC systems.

ECO80+ will be available from now on at a reasonable MSRP of 45.99- £. More information about ECO80+:
