

## PRESS RELEASE

Enermax Brick: Sturdy and ultra-compact 2.5" HDD aluminium enclosure

### Pocket-sized Lightweight for Secure Data Transport

In the face of growing amounts of data, external hard disk drives are essential devices for backup and transport of data. Brick, the new HDD enclosure from Enermax, meets all requirements for portable 2.5" hard disk drives: compact size, user-friendly handling, superior and robust design.

**Hamburg, 25th August 2009.** The **Jazz series** established Enermax as a manufacturer of high-quality and elegant HDD cases. Moreover, Jazz achieved renowned international "IF Product Design Award" in 2008. The new 2.5" aluminium enclosure Brick continues the precious and timeless design of Enermax HDD cases. Due to its ultra-compact and handy size (113 x 76 x 17mm) and its low weight (only 65g), Brick is the perfect solution for portable HDD, which are designed for the transfer and backup of laptop data, videos, photos or presentations. An elegant, leather-look carry bag protects the enclosure and the HDD during transportation. Brick is available in two colour versions: black or silver.

#### Comfortable Data Transfer and User-friendly Handling

Brick is compatible with 2.5" SATA hard disk drives (SATA I and II) with up to 7.200 RPM and supports also the energy-saving and shock-proved 2.5" solid state drives (SSD). The USB 2.0 interface ensures not only power supply of HDD, but also quick and comfortable data transfer to nearly all computers – without additional driver software. Brick makes the installation of HDD easy and user-friendly ("One Screw Design"): Release only one screw, slide open the case and plug in the hard disk drive. A screw driver is already included. Best possible cooling of installed HDD is guaranteed by the air vents in the front. Furthermore, the aluminium case provides excellent heat dissipation.

Brick is available in black or silver at a RRP of £8,59 without VAT. More information and product photos: [www.enermax.co.uk/brick](http://www.enermax.co.uk/brick).
