

PRESS RELEASE

Enermax @ CeBIT 2010: Two new Midi Tower and one new Big Tower

Preview of Outstanding PC Case Premieres

Enermax cases are real eye-catchers. Sometimes they impress with their clear-cut and prominent design, sometimes with their pure elegance. But something all Enermax cases have in common: high quality, maximum usability and a well-conceived cooling system. The new cases, which Enermax will present on this year's CeBIT, continue with this line.

Hamburg, 19th of February 2010. The monotonous and boring cases, which bore the name "PC" a couple of years ago, have served their time. In our days, the design of PC cases plays an important role. Who wants to put a grey plastic case into his living-room or even take it to a LAN party? One puts emphasis on simple elegance, the other one is searching for a spectacular gaming case. On the Enermax booth at this year's CeBIT, both will find their ideal PC case. Enermax presents two completely different Midi Towers and one high-end Big Tower:

Volcanus: Hot Design – Cool Case

Many CeBIT visitors will be enthusiastic about the new Midi Tower Volcanus. The exceptional flame design on the front and side panels is dedicated to gamers and all people who like eye-catching cases. Enermax delivers its new Midi Tower with an integrated Apollish Vegas fan. By pushing a button on the front panel, Users can switch between seven special light effects. Apart from that, Volcanus offers a great cooling performance. It accommodates up to five fans and ensures a steady air circulation due to the meshed front panel.

ECA3190: Luxury Midi Tower

The high-glossy front of new Midi Tower ECA3190 is made of charcoal black acryl. Even behind this only partially light-permeable surface (10% light transparency), the pre-installed Apollish Vegas fan generates intense colours and extraordinary light effects. The luxurious outer design meets a comfortably equipped interior: Enermax integrated various useful tools, which ensure quick and easy installation of system components.

ECA5010: The New Flagship

Many are waiting with bated breath for the premiere of the new Enermax Big Tower. The high-end gaming case ECA5010 appears with an innovative and high-performance cooling concept, which can be adjusted flexibly according to the system requirements. The solid and clear-cut design leaves no doubt: The ECA5010 will be the new Enermax flagship case.

More details about the ECA5010 and other new Enermax products, you will come to know at CeBIT. We are looking forward to meeting you:

Enermax @ CeBIT 2010
2nd – 6th of March 2010
Hall 17, Booth G22
