

PRESS RELEASE

Jazzmate – Enermax presents new 2.5" HDD/SSD enclosure

Elegant Travelling with High Speed

With Jazzmate, Enermax introduces an elegant and functional HDD/SSD case, which is particularly suitable for travelling. It accommodates 2.5" HDD or SSD and can be obtained with three different interfaces. Enermax implemented amongst others the new USB 3.0 standard into its enclosure series. In the future, the data transfer of USB 3.0, in comparison with the predecessor USB 2.0, will be up to 10 times faster. Jazzmate is available soon.

Hamburg, 30th of November 2010. With the **Jazz series**, Enermax built up a reputation as manufacturer of high-quality and elegant external hard disk cases and has won international awards like the famous "IF product design award". The successor series **Jazzmate** follows this line: decent appearance with user-friendly functions. Jazzmate is designed for 2.5" Hard Disk Drives (HDD) or 2.5" Solid State Drives (SSD) with SATA interface and a maximum height of 9.5mm. Users can choose between three different models: Apart from the versions with an external USB 2.0 or eSATA interface, Enermax presents also a model with the new high-speed standard USB 3.0, which strikingly increases the data transfer rate. In the future, it is able to reach up to 5 Gigabit per Second. Already since a couple of months, PCs and notebooks are available with USB 3.0 ports. Especially users, who regularly work with external hard disks to for example backup data or to maintain huge video or photo collections, will profit from changing to the new standard. Additionally, USB 3.0 also supports its predecessor USB 2.0.

Jazzmate

Comfortable and Cool Data Transport

Well protected against vibrations by a removable silicon sleeve, **Jazzmate** is the ideal enclosure for travellers. Thanks to its compact size (134 x 78 x 16mm) the enclosure even fits into user's pocket. The assembling and replacement of HDD or SSD is simple: The user has to unlock the case by the aid of a slide switch and can install the hard disk – a great advantage for all who use several HDD or SSD. The robust double-sided steel mesh ensures an excellent air circulation. In this way, the installed hard disk is effectively cooled from both sides and hot spots can be eliminated.

Jazzmate 2.5" is available soon. The MSRP of the USB 2.0 version (EB211S-B) is £13.90 incl. VAT. The model with eSATA (EB211ES-B) comes with a MSRP of £17.90 incl. VAT and the USB 3.0 version (EB211U3-B) will cost £25.90 (MSRP incl. VAT). More technical details and photos: www.enermax.co.uk/jazzmate.
